

Application No. 10/630,525
Response to OA dated: March 9, 2008
Response/Amendment dated: July 10, 2006

In the Specification:

Please amend the Specification as shown below. Applicant respectfully submits that the proposed amendments correct informalities in the Specification, and that no new matter is being added. (For reference, please note that the paragraphs have been renumbered in the Published Application, so that original Paragraph [0116] appears in the Published Application as [0156]).

Please replace paragraph [0116] with new paragraph [0116] shown below.

Memory Blocking

[0116] The garbage collector has to make sure that the running program never runs out of memory. The goal is to free enough memory and to compact the blocked memory in order to satisfy the allocation needs of the running program. The desire is to keep the memory blocking as low and as compact as possible.
